Settings

Daily Sales Analysis and Staffing Needs

Threshold sales per hours	Threshold 0		
Monday	Sales Hours 0	Sales Volume 0	Number Of Customers 0
Tuesday	Sales Hours 0	Sales Volume 0	Number Of Customers 0
Wednesday	Sales Hours 0	Sales Volume 0	Number Of Customers 0
Thursday	Sales Hours 0	Sales Volume 0	Number Of Customers 0
Friday	Sales Hours 0	Sales Volume 0	Number Of Customers 0
Saturday	Sales Hours 0	Sales Volume 0	Number Of Customers 0
Sunday	Sales Hours 0	Sales Volume 0	Number Of Customers 0
SAVE			

Settings give you control over the "Daily Sales Analysis and Staffing Needs" chart on the dashboard, allowing you to manage key data points that influence staffing decisions. You can set a **Threshold Sales per Hour**, which defines the baseline sales target to determine staffing adjustments. The chart also enables you to track **Sales Hours** for each day, aligning staffing with operating hours, and record **Sales Volume** to monitor revenue and adjust staff levels accordingly. Additionally, you can input the **Number of Customer** served each day, helping to align staffing with giger demand. These settings provide a comprehensive way to optimize staffing levels based on actual sales performance and giger volume.
